EDUCATION

IFET COLLEGE OF ENGINEERING

Bachelor's of Engineering

Completed in 2023

VRP MATRIC HIGHER SECONDARY SCHOOL

Computer Science

Completed in 2019

EXPERTISE

Full Stack Development

My SQL Database

Python

Basics of C, C++

Basics of Networking

Bootstrap

Git & GitHub

Problem-Solving

Team Player

Project Management Tools

Communication Skills

AWARDS

Mar 2019 | IFET College of Engineering
100% Attendance of the year

PROFILE

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Nullam pharetra in lorem at laoreet. Donec hendrerit libero eget est tempor, quis tempus arcu elementum. In elementum elit at dui tristique feugiat. Mauris convallis, mi at mattis malesuada, neque nulla volutpat dolor.

PROJECTS

- **Solar Tracking using light Sensor** 2019-2020
 - A solar tracker is a device that automatically adjusts the position of solar panels or solar collectors to maximize their exposure to sunlight throughout the day.
 - Light sensors play a crucial role in solar trackers by detecting the direction of the sun and allowing the tracker to follow its movement.
- **College resource portal using Django** 2020-2021
 - Creating a college resource portal using Django can be a great way to provide students and faculty with easy access to academic resources, information, and services.
- **Email alert on WhatsApp Using Twilio** 2021-2022
 - Sending email alerts to WhatsApp using Twilio can be a useful way to receive important notifications directly on your WhatsApp account.
- **Detection of Image Duplication** 2022-2023
 - Detecting image duplication using deep learning involves identifying duplicate or near-identical images in a dataset.
 - This can be useful for tasks like copyright infringement detection, content curation, or image deduplication in databases.
